

Announcement of lecture introduced by me

يسر نادي البرمجة بكلية الحاسبات وتقنية المعلومات أن يعلن عن لقاء

مراجعة الاختبار الدوري الثاني لمادة برمجة 1

محاور اللقاء:

- مراجعة التكرارات Loops بأنواعها
- مراجعة الدوال Methods وكيفية استخدامها
 - أسئلة وأجوبة

الوقت

الثلاثاء 22 ربيع الأول لموافق 19 نوفمبر

11:00 ص – 1:00م

المكان مسرح الكلية

مقدم اللقاء: عبدالله النهدي

SECURITY INTELLIGENCE CENTER DIVISION

Al-Midra Tower, 6th Floor, Room: E-618, Dhahran Tel: 880-0555, Fax: 875-8309 August 15, 2021

TO WHOM MAY THIS CONCERN

In recognition of Abdullah A Al-Fares excellent job performance and significant contribution to the Network Security Group in Security Intelligence Center Division, I would like to express our appreciation for his efforts and dedication during his assignment as a summer student with our organization from June 13, 2021 until August 31, 2021.

He worked efficiently while maintaining a clear focus on the overall objective of his assignment. Abdullah has proven to be highly dependable, displayed a high level of dedication, and prompt skills for problem solving. During his assignment, Abdullah established himself as a key player in the team and as a result, he was assigned to work on challenging security tasks such as:

1- E-Mail Gateway Security:

- Classify the spam emails and block them accordingly.
- Classify the phishing e-mails and report them.
- Generate the Anti-Spam Report (Daily & Weekly) and share it with Security Operations Center and the other concerned organizations.

2- Web Gateway Security:

- Analyze the website categories, assess and take the necessary action.
- Handle all the website access requests.

3- Emerging Technology Evaluation

- DNS Advanced Security.
- Advanced Artificial Intelligence Technology.

Abdullah is highly motivated and resourceful, and has proven his ability to complete all tasks with minimum directions. He is also a team player and gets along extremely well with his colleagues.

Abdullah's exceptional contributions were highly valued and appreciated by all team members. I wish him more success in future endeavors. I feel confident that he has a bright and promising future ahead of him and would be an asset to any organization.

I wish him the best of success in his future assignments and a pleasant career.

Abdulaziz A Alrushaid, Group Lead Network Security Group

Machine Learning-Based Approach To Predict COVID 19 Deaths

Abdullah Alkatheri, Abdullah Fares, Salem Abdullah, Saeed Alghamdi Supervised by: Dr. Waseem Ahmed

Introduction 🧿

Over the past two years, most health authorities have obligated people to wear a mask and to keep a distance of two meters to avoid Infection with Corona virus From here we started to think about whether there are other causes such as eating habits? Also, whether the vaccine might actually affect the infection rate.

Abstract

Project idea is to build a Machine Learning (ML) algorithm to analyze the data we have from all over the world, then combine it with datasets of vaccines and dietary habits, and then predict the death cases and what is the factors that increase or decrease the deths.

Objective

- Build a website contains the results of the model.
- Configure reasons using ML that effect number of deaths.
- Help researchers and health organizations with the conclusion.

Tools

Datasets

Global Statistics								
Date	Country	New Cases						
Comulative	New Deaths	Comulative Deaths						
	Vaccine							
Country	Population	Total Vaccinations						
Vaccinated 1 Plus dose	Fully Vaccinated	Comulative Deaths						
First Veccine	Date No.	Vaccine Date						
Food								
Country	Alcoholic	Animal product & fats						
Cereals	Eggs	Aquatic Product, Fish & Sea food						
Fruits	Ment	Milks						
Spices	Sugar & Sweeteners	Olicrops & Vegetable Olis						
Starchy Roots	Vegetables & Vegetal Product	Obesity E Undersourished						

Conclusion & Results

Strong relation between New deaths & Predicted deaths.

Following relations has been found based on our research.

Positive relationship			Inverse relationship				
Aserage new cases	25%	Alcoholic	3%	No. of Vaccine Used	20%	Animal fats	3%
Animal Products	914	Eggs	12%	Aquatic Products	4%	Ceresis	5%
Fish & Sea food		Mest		Proits	2%	Spices	2%
Milk	280	Olicrope	HS	Vegetables	18%	Vegetal Products	3%
Vegetable Oliz		Officials		Miscellaneous	15%	Stimulanta	14%
Starchy Boots	13%	Sugar & Seesteners	22%	Sugar Crops	4%	Treesuris	20%
